SCALEFRAC

880

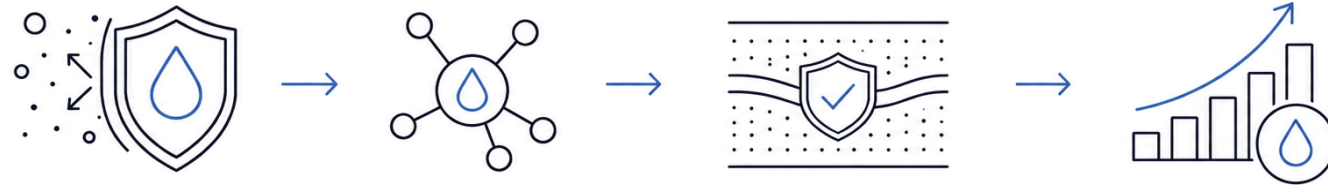

SCALE INHIBITOR™

BENEFITS OF SCALEFRAC 880

SCALE INHIBITOR™

- ⚡ Lower FR consumption by **20%**
- ⚡ Increases FR performance
- 🛡️ Less degradation to FR over time
- 📈 Advances beyond conventional inhibitor performance
- 🛡️ Less colloidal damage to the shale formation
- 🏆 Superior performance
- 🌿 Lower vocs for the entire chemical package
- 📉 Decrease your total cost to treat 1000 gallons by 10% to 30%
- 🚗 Reduce horsepower consumption
- 🌱 Environmentally friendly

HOW IS IT POSSIBLE?

SCALE CONTROL

Prevents calcium, magnesium, and barium deposits from forming during stimulation operations.

HYDRATION SUPPORT

Improves friction reducer hydration for faster activation and more consistent performance.

FORMATION PROTECTION

Helps reduce colloidal damage and minimizes flow restrictions within the fracture network.

PERFORMANCE OPTIMIZATION

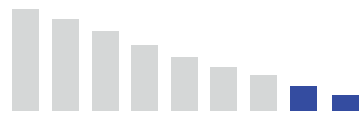

Supports lower chemical consumption while maintaining efficient fluid performance.

ENVIRONMENTAL RESPONSIBILITY

ScaleFrac 880 supports more efficient and environmentally responsible fracturing operations by reducing chemical demand and lowering overall treatment requirements. Its advanced chemistry helps operators improve performance while minimizing environmental impact.

BENEFITS OF SCALE CONTROL

- Reduced flow restrictions
- Improved equipment protection
- Reduced formation damage
- Lower treatment cost
- Improved fluid efficiency
- Higher achievable BPM

COST

SCALE CONTROL AND PERFORMANCE OPTIMIZATION

ScaleFrac 880 helps prevent calcium, magnesium, and barium deposits from forming during hydraulic fracturing operations. By controlling scale before it accumulates, the technology helps maintain fluid flow, improve treatment efficiency, and reduce restrictions that can impact performance.

Beyond conventional scale inhibition, ScaleFrac 880 supports friction reducer hydration and helps reduce polymer degradation over time. This dual-function approach allows operators to lower chemical consumption while maintaining consistent treatment performance throughout the job.

(Ca, Mg, Ba)

SCALEFRAC 880
INHIBITOR MOLECULES

UNRESTRICTED
FLUID FLOW

IN ADDITION TO SI

We are specializing in manufacturing:

- FRICTION REDUCERS
- BIOCIDES

OTHER SERVICES

We can provide turnkey service by supplying pump crews.
